Perlon®

PARALLEL WINDING

X130 is the Classic Perlon line, still a favourite choice of many anglers in the Five Continents since its development in the Fifties. Thanks to its reliable and consistent performance, **X130** offers an excellent balance of properties needed in a premium fishing line:

- high tensile strength
- good abrasion resistance
- great toughness
- long durability
- wide assortment of diameters, colours and put-ups

PARALLEL WINDING

X135 is the further development of the classic x130, to offer added softness and knot strength. It provides:

- outstanding limpness and easy handling
- natural lure presentation
- superior and more accurate castability
- less twisting, kinks and backlashes
- higher impact strength
- more toughness

Perlon®

PARALLEL WINDING

X145 is the most advanced anti-abrasion fishing line. Perlon Monofil GmbH exclusive polymer technology gives **X145** 10 times greater abrasion resistance than most fishing lines in the same diameter, yet **X145** is extremely soft and smooth, offering less memory and longer and more accurate casting.

PARALLEL WINDING

X170 is the new generation of monofilament technology. Perlon Monofil GmbH unique raw material formula and extrusion process provide a superior premium fishing line with unmatched strength, the ideal choice of competition anglers:

- maximum linear and knot strength
- no soft spots
- superior toughness
- controlled stretch for great sensitivity and superfast hooksetting

FLUOROCARBON *Collection*

FF0644010

Perlon Monofil

PARALLEL WINDING

XF100 is a multipurpose fluorocarbon line that provides a perfect balance of characteristics and a complete range of diameters for saltwater and freshwater fishing. Its medium softness makes it a perfect choice both as a leader material and for casting.

- invisible
- super fast sinking speed
- superior abrasion resistance
- low stretch and high sensitivity
- it does not absorb water, so it keeps its strength

DIAMETER (MM)	0.120	0.140	0.160	0.180	0.200	0.220	0.240	0.260	0.280	0.300

FF0644012

Perlon Monofil

PARALLEL WINDING

XF200 is the latest development in fluorocarbon technology. Its unique blend of PVDF raw material enhances all the characteristics of fluorocarbon, and makes **XF200** one of the strongest and best fluorocarbon lines for hooklengths and match fishing.

- superior strength
- high impact resistance
- quick hooksetting
- It sinks 3 times faster than nylon

DIAMETER (MM)	0.14	0.16	0.18	0.20	0.22	0.23	0.26	0.28

PE BRAIDED *Collection*

FT0644040

Perlon Monofil

XP100 is a multipurpose soft PE blended braid that offers a good balance of value and performance and can be used in a variety of fishing techniques.

- very low stretch
- great sensitivity and hooksetting power
- ideal for bottom fishing and trolling
- it sinks faster and deeper

DIAMETER (MM)	0.16	0.18	0.22	0.26	0.30

FT0644041

Perlon Monofil

XP200 is the very latest in PE braids technology. Braided by the most advanced braiding machines, **XP200** is a rounder line that performs better than flat braids. Its rounder and smooth body enhances casting accuracy and distance. **XP200** is thermally enhanced with a unique hot temperature coating technology that adds additional stiffness to the line for better casting and holds its colour much longer.

- maximum strength
- less wind knots and tip wraps
- minimum stretch
- ideal for spinning and casting

The product safety sheets (with important safety information) are available on-line www.gruppodp.com/safety

Perlon[®] Monofil

Perlon-Monofil GmbH are preferably used for fishing lines and the stringing of tennis, badminton and squash rackets. Outstanding product characteristics are best possible linear-and knot-tenacity as well as a constant diameter-accuracy.

Thanks to **Perlon** know-how and a wide range of raw materials within our **Lanxess-Group**, **Perlon** are able to adjust and design the different types of monofilaments to the particular needs.

Perlon develop and produce sports fishing lines which offer the perfect product to the game fishermen and hobby angler as well.
